Subject: RE: New OUR postal documents

Dear Mr Buckland,

Thank you for the invitation to your rubber stamp facilities for turning a blind eye to cruddy service and deteriorating value-for-money.

I presume the 'consultation' for the 2006 postal prices means more postal hikes and rubber stamps by the cronies at your office?!!

Isn't the highest postal rates in Europe enough?

What are you doing about it Mr Pass-the-Buckland?

Our Recorded & Special Delivery rates have gone up 80% and GPO haven't even negotiated those rates with Royal Mail to date. Aren't you supposed to prevent exactly this type of abuse by a commercialized monopoly?

Are you sitting on your hands as per Flat Rate Dial Up's demise, the postal debacle, Postal service failures, telco price rises, postal price rises, the highest electricity prices in Europe, overpaid Execs and an expensive Regulatory system with absolutely no end-product but PR spin from your offices to justify patent ineptness.

There's a mouthful. Some would call it "acid" I'd say "accurate".

I await your "evasive and bureaucratic answers" combined with your ongoing "remarkable inactivity and lack of interest" as a recent writer to the Press (very accurately, in my experience) described your lowly office.

Have you ever considered resigning and becoming a whistle-blower to expose the truth we all suspect behind OUR ?!

Yours cynically

John McQuaigue
